IMAM SETYA UTAMA

South Tangerang, Banten 15412 | 0895403495533 | utamaimam04@gmail.com

PROFESSIONAL SUMMARY

Results-driven Senior Specialist in QA Automation with expertise in developing automation frameworks and CI/CD practices. Committed to enhancing team collaboration and operational efficiency while delivering high-quality software solutions. Currently focused on building AI assistants for routine automation testing.

CORE SKILLS

- Selenium
- Appium
- Cypress
- WebdriverIO
- Playwright
- Katalon Studio
- RestAssured
- Mocha-Chai
- Cucumber BDD
- TestNG
- Java
- JavaScript
- TypeScript
- CI/CD
- Continuous Integration
- Git
- Bitbucket / Actions
- Atlassian JIRA
- K6
- Gatling
- Test Rails
- AI Agent

PROFESSIONAL EXPERIENCE

07/2024 – Present

Senior Specialist QA Automation
EDTS

- Designed and implemented automation regression tests achieving 80% code coverage.
- Developed pattern framework for automation testing, enhancing script execution times by 80%.
- Automated diverse QA test scenarios, enhancing system quality and optimizing resource allocation.
- Developed AI assistant for automating mobile, web, and API tasks, streamlining workflow for automation efforts.
- Produced visual aids for QA team to monitor and refine automation processes, improving overall testing visibility.
- Created and maintained test libraries, simplifying access to test data for QA team members.

05/2023 – 07/2024

Technical Quality Lead (Sr. QA Engineer Automation)
Aplikasi Super

- Achieved 95% code coverage through design and implementation of regression tests.
- Implemented an automated QA workflow that improved script execution times by 50%.
- Automated several key QA test scenarios, saving time and resources.
- Enhanced automation system usability through development and maintenance of comprehensive test libraries.
- Developed visual aids for QA team to track automation processes effectively.

06/2021 – 05/2023

Senior Software Development Engineer in Test
Alami Sharia

- Reached 90% code coverage by implementing automation regression tests, boosting reliability.
- Executed automated scripts during development phases, enhancing software testing efficiency and reducing manual effort.
- Developed tailored automated testing solutions to meet specific software requirements, improving test coverage and reliability.
- Initiated continuous integration from GitHub Actions for efficient mobile, web, and API testing.
- Worked alongside development teams for detailed assessments of released software products.
- Mapped test data to user expectations, ensuring strict adherence to product quality standards and enhancing overall user satisfaction.
- Applied debugging techniques efficiently to tackle test-related problems.

03/2021 – 06/2021

Software Test Engineer
CT Corp Digital

- Developed automated test scripts to enable instant validation of software modifications.
- Identified and resolved multiple software code bugs, improving overall application stability.
- Developed comprehensive testing strategy for new software application to ensure quality and reliability.
- Engineered tools for analyzing and debugging software failures.
- Drafted detailed bug reports to document testing issues, facilitating effective communication with development team.

02/2020 – 03/2021

Software Quality Assurance Engineer
PT BRI, Tbk (Persero)

- Created automated test scripts for immediate validation of software changes.
- Established comprehensive testing strategy for new software application to ensure quality and functionality.
- Identified and resolved multiple bugs in existing software code, enhancing overall software stability.
- Developed tools to analyze and troubleshoot software failures.
- Drafted detailed bug reports to document issues encountered during testing, facilitating quicker resolution and improving communication with development team.

02/2019 – 03/2020

Software Engineer
PT Asuransi Jasa Tania, Tbk

- Developed and deployed software applications and websites to enhance staff utilization.
- Implemented user-friendly databases to streamline data access.
- Drafted programming codes for IT projects in accordance with industry standards.
- Monitored program performance and generated reports to pinpoint issues.
- Provided technical support to staff, troubleshooting computer and software challenges.

10/2017 – 09/2018

Java Programmer
Indocyber Global Technology

- Developed and deployed server-side components with Java.
- Implemented RESTful APIs for services integration.
- Debugged Java code, resolving technical issues to ensure application stability and performance.
- Optimized existing code to improve performance.
- Developed web application using HTML, Java, and CSS, enhancing user experience and functionality.

EDUCATION

01/2017

Bachelor's Degree: Information Systems
Gunadarma University
